

## Proposal for Rental of Scanner Unit

To speed up the counting of the ballots at the city convention, to free up volunteer teller time, and to get results quickly, I propose we rent the following equipment for the Minneapolis DFL City Convention.

This scanner is a OMR (optical mark read) scanner. It does not read handwriting, just bubbles marked in on a special form, as in school tests or lottery slips.

For photos of the equipment, plus more information, see:  
[www.bubblescan.com](http://www.bubblescan.com)

We should rent the scanner for two months. We need to allow time for testing, setup, and for shipping the unit to us and back from us.

Plan A	Rental - first month	\$189.50
	Rental - second month	\$189.50

We can use their standard 50 question A-F answer form. They are half a sheet wide, 4.25 x 11.

50060701	50 questions A-F form (500)	\$25.00
----------	-----------------------------	---------

We should also get some blank paper to test making a more customized ballot. This paper is perforated down the middle, so we get two ballots from each sheet. It can be printed with a regular computer printer.

BPP	Blank paper, perforated (500)	\$30.00
	Shipping - unit	\$20.00
	Shipping - forms	\$20.00
	Shipping - unit return	\$20.00
	Total	\$494.00
